# Index

## 1. Installation

### Step 1

### Check Permissions

Make sure the "app" and "lib" directories of your Magento and all directories inside it have full written permissions or set permissions on the each directory equal to 777 or 0777.

**Important! Change all permissions back after installation.**

Read more about permission at
http://www.magentocommerce.com/wiki/magento_filesystem_permissions

### Step 2

### Disable Compilation
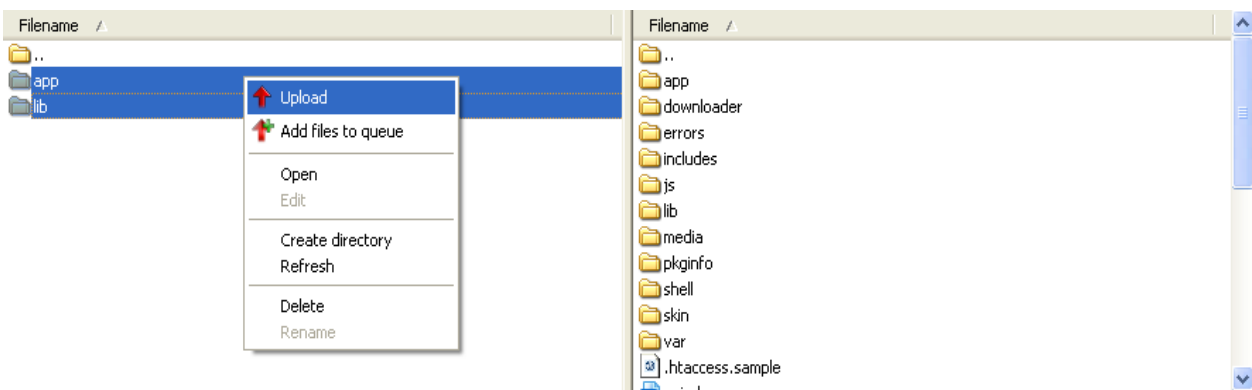

Log into Magento **Admin Panel** and go to **System → Tools → Compilation** and disable the compilation.

After **step 5** you can run the compilation process again.

### Step 3

### Upload Files

Upload all folders from the extension package to the installation directory of your Magento software using an FTP client.

**Step 4**

**Clear cache**

Go to **System → Cache Management**.

Clear the store cache.

**Step 5**

**Re-login**

Log out and log back into **Magento Admin Panel.**

**Step 6**

**Use Extension**

Go to **System → Configuration**.

In the left column you will see the new tab – **Biztech Extensions.**
